## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 37- 42 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 37 recites the limitation "the variable data obtained by searching out the file" in the last two lines of the claim. There is insufficient antecedent basis for this limitation in the claim.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 44, 47-48, 51 and 54-55 are rejected under 35 U.S.C. 102(b) as being anticipated by Lewis et al. U.S. Patent No. 5,812,394.

Claims 44, 47-48, 51 and 54-55 are anticipated by Lewis et al. (e.g. See Figures and corresponding textual descriptions. Lewis et al discloses a first editing process (designing or choosing a displayed symbol which is displayed with a variable name) and a second editing process for generating control procedures (via the underlying ladder logic associated with the functions related to the symbol).
